

Product Data sheet

Hemp biomass

Description:

The CBD hemp biomass refers to the whole hemp plant. The hemp biomass can be used for the production of a variety of products such as food, hemp fuels and energy, hemp oils and hemp fibre. For many years, numerous studies have been conducted regarding the hemp plant. This versatile plant can be used in almost all aspects of human life. In the food industry, in the medical sector and as a biofuel which is a good source of renewable energy.

The CBD hemp biomass has been used for centuries for different purposes. It can be used for the making medicine, food (from the seeds and oils), and beauty products such as hemp oils and for the production of fibre and fabrics.
