Craft Delux

You Will Feel Hugging The Clouds While You Sleep...

Due to the special harmony of extra generous pure cotton and fiber we use in the filling of our Craft Delux mattress, you can fall asleep faster in your mattress and have a better quality sleep. You may feel like you are sleeping on clouds. Craft Delux with an extra removable mattress pad layer is the pinnacle of luxury and high comfort with the best natural materials and hand-spun structure. With its double-sided structure, you can reach the comfort you want at any time. With its special comfort layer that supports the body and its orthopedic spring feature, it provides an environment of relaxation, while the Viscon yarn structure provides a unique sleep experience without exposing it to perspiration.

Craft Delux, whose glamor is hidden in the details, will add air to your home with its carefully processed texture and handmade. At the same time, it will make you feel the soft texture of the clouds with its textural and sensory originality from nature.

Viscon Yarn

Viscose fabric, whose raw material is beech wood and has cellulose like cotton, has a very high moisture absorption capacity. Thus, it does not sweat.

Fiber and Cotton

Cotton, which preserves its naturalness and softness without being exposed to chemical treatment, has a unique harmony by trapping the air inside, providing insulation to the fabric, absorbing moisture quickly in its fiber, and expelling it with steam.

Hypersoft

It has an ideal comfort layer thanks to its flexible and soft structure as well as its high density.

Extra Comfort Layer

It offers long life, easy and practical use with special handmade and natural filling materials. In addition, its air pores, it prevents excessive sweating and cold.

Carbon Plus

Meditate While You Sleep

I can hear you saying, "I feel so tired today". The human body and mind are exposed to stress and fatigue throughout the day. Here is a technology developed as a solution to this problem in carbon. Carbon technology, with its anti-static and anti-stress features, provides you with an environment of relaxation by removing the negative energy from our body. In this way, you will get as much as 8 hours of sleep with 6 hours of sleep.

Gel Memory Foam Technology

Thousands of capsules are placed in the memory material to add air-conditioning feature. While the feeling of sweating is minimized, the cells with increased permeability provide air circulation in the mattress.

Hypersoft

It has an ideal comfort layer thanks to its flexible and soft structure as well as its high density.

7-Zone Pocket Spring Technology

Thanks to the bag spring system, which is the sleep technology of the 21st century, acting independently from each other, it provides comfortable and uninterrupted sleep comfort in the sleeping position with its orthopedic feature.

Carbon Yarn

Helps reduce stress and fatigue. It removes negative energy from the body. It has a non-sweating fabric texture.

Natural Plus

The Elegance of Nature..

Designed for those who are keen on the natural of everything, natural plus; Produced from the sap of the rubber tree, latex, together with its porous structure, provides special comfort for you in your mattress according to the center of gravity. The linen fabric obtained from the flax plant, while providing air flow thanks to its large pores, leaves you alone with natural sleep with its high moisture absorption power and quick-drying structure.

Latex

This completely natural material, produced from the sap of the rubber tree, reacts quickly to the pressure of the body with its elastic structure. With its perforated high-density structure, it maintains the temperature balance by providing air circulation inside the mattress, thus providing a healthy sleeping environment.

Wool

Having an advanced fiber structure, wool has a cooling effect against sweating and a warming feature against cold. It has the ability to absorb 33% moisture without feeling wet.

Double-Sided Feature

With double-sided use, you can reach the desired comfort whenever you want. With the special filling materials used, it offers you a comfortable sleeping environment in summer and winter.

Natural

Designed for those who do not give up on naturalness, the wool-blend fiber filling helps keep your mattress cool in summer, and naturally maintains body temperature thanks to its heating effect in winter and the air mass between the fibers. Thus, a relaxing and healthy sleep environment is created for you.

Linen Fabric

While it provides a natural protection to your skin, it also prevents sweating and has the feature of absorbing static electricity in your body along with its anti-bacterial feature.

Wool Blended Fiber

While the feature of balancing body heat is provided by fiber, wool, on the other hand, supports the preservation of body heat thanks to the air mass in its fibers.

Aloevera Visco

The Miracle of Aloe Vera Going Back to Centuries & The Power Memory Foam...
Aloevera visco supports the body properly and balancedly throughout the night thanks to the orthopedic structure of viscos contained in the mattress, while preparing the day to start the day fresh. Skin-friendly aloe vera fabric balances the energy and moisture in the body. At the same time, it protects the skin and prevents irritation. It creates a natural sleeping environment thanks to the combination of aloe vera fabric and the body shape of the memory foam.

Aloevera

The aloevera fabric that we have used in the fabric of our mattress protects the skin's flexibility and freshness by purifying the skin from dead skin with its skin renewing feature.

Memory Foam

The memory foam in the mattress takes the shape of your body when you lie on the mattress, so that the balance of weight, temperature and pressure is created, allowing you to achieve the highest level of comfort. It prevents nervous system, spine and joint disorders by supporting the body's weight.
